

REQUEST FOR MARKET SHIPPING QUOTE

Ampac Forwarding, 2411 Schirra Place, High Point, NC 27263 336.889.6617 Fax: 336.889.7648 info@ampacforwarding.com

At Market, samples sold from showrooms often require disassembly, wrapping, and transport to a cross dock facility. Depending on the delivery method, samples may then require additional blanket wrapping or packing.

Ampac understands how costly and frustrating it is when samples are received without all parts or the proper identification original packaging offers. We will deliver inventory tags to participating High Point showrooms before the end of Market, so that personnel at showrooms can fill out and place them on the samples. Alternately, Ampac will complete these inventory tags onsite during pickup, which may add to billable labor hours, but will insure accuracy.

In either case, product will not leave showrooms without clear identification of all parts. For your convenience, the same tags will then be attached to the exterior packaging of all items being shipped.
